

But the industry as a whole was already on notice.

Part II – In the 1940s and 1950s, the oil industry questioned research that pointed to fossil fuel emissions as the main ingredients of smog, a record that reads like an early draft of its later approach to climate change.

Subject: Heads up

Importance: High

A heads up on two matters of importance:

- We have learned that Inside Climate News today will break the first of three stories regarding what the American Petroleum Institute and Humble Oil knew about climate change going back to the 1950s and 1960s.
- We have heard that Peabody Energy has or is filing for bankruptcy today.
