Hi all,

Michael has an update that he would like to share about our joint project. Please call in at 3PM CT if you are able.

Dial-in: [REDACTED]

Access: [REDACTED]

If you are unable to call in at this time, please text Michael on his cell (612-963-1268) for an update individually.

Thank you,

Jillian Theuer

Ellison update

Lee, et al,

As you recall, we are waiting for the hire of the “environmental fellows”. They have been chosen. She was told by Ellison that the intent is to fund these positions after the subsidy funding expires. One is longtime MCEA Energy and Climate Program Director Leigh Currie who Fresh Energy has worked with extremely closely her entire public interest career (woo hoo, yay!!). She starts after Labor Day, and the other has just started, Pete Burda of the Robins firm, who is an experienced class action litigator.

I will reach out to him next week and send Leigh our doc tomorrow.

I already spoke to her today to congratulate her and she was super excited to hear about our request to AG Ellison.

Michael Noble

Executive Director

Fresh Energy
